

larger group of nominees (termed the "WIDECAST"), a smaller subset (the "NARROWCAST") will be identified for more detailed consideration. The names of the NARROWCAST individuals, along with a short biosketch of each, will be posted on the SAB Website (www.epa.gov/sab), and public comments requested on the individual's expertise, real and perceived conflict-of-interest, and the overall balance of possible biases represented on the PMCIAP. Public reaction to the NARROWCAST candidates will be considered in the selection of the PMCIAP. Other selection criteria include the following: recognized expertise to address the Charge, ability to participate in an impartial and objective manner; and the need for balance among the members of the panelists.

PMCIAP members will be asked to attend at least one public meeting, possibly followed by a public teleconference meeting over the anticipated 3-month course of the activity. The Executive Committee (EC) of the SAB will critically review the PMCIAP's report and reach a judgement about its transmittal to the Administrator.

Notice of Open Meeting, Environmental Financial Advisory Board Workshop on Environmental Management Systems, November 8, 2001

The Environmental Protection Agency's (EPA) Environmental Financial Advisory Board (EFAB) will hold an open meeting of its Cost-Effective Environmental Management Workgroup on November 8, 2001. The meeting will be held at EPA's Historic Great Hall at the Ariel Rios Building North, 3rd Floor, 12th Street & Pennsylvania Avenue, NW in Washington, DC. The meeting will begin at 9 in the morning and end at approximately 3 in the afternoon.

The purpose of the meeting is for the EFAB to collect information and ideas with respect to the linkage—both real and potential—between the implementation of Environmental Management Systems (EMS) and EMS certification and financial performance. Information from this meeting will help the Board develop a report with advice and recommendations to EPA.

The meeting will consist of a group of informed panelists from private industry, public utilities, municipalities, as well as the financial services industry, who will share their experience with EMS implementation and improved financial performance.

Please confirm your attendance because of increased security into the building and limited seating. Contact Vanessa Bowie, U.S. EPA, at 202 564-5186 or bowie.vanessa@epa.gov.

II. What Action is the Agency Taking?

EPA has assessed the risks of Ethyl Parathion, Phorate, Phosalone, and Temephos and reached a Reregistration Eligibility Decision (RED), an Interim Reregistration Eligibility Decision (IRED), or a Report on FQPA Tolerance Reassessment Progress and Interim Risk Management Decision (TRED) for each of these organophosphate pesticides.

1. *Ethyl Parathion RED.* All remaining uses of Ethyl Parathion are being voluntarily canceled and phased out during the next few years. Because no uses will remain, Ethyl Parathion will

not be included in the cumulative assessment of the organophosphate pesticides.

2. *Phorate IRED.* With the adoption of additional risk mitigation measures, Phorate fits into its own risk cup; its individual, aggregate risks are within acceptable levels.

3. *Phosalone TRED.* With no U.S. registrations and import tolerances only, Phosalone fits into its own risk cup without additional risk mitigation.

4. *Temephos RED.* With risk mitigation measures adopted, Temephos is eligible for reregistration. Because it has no food uses or other uses that

result in exposure to children, Temephos will not be included in the cumulative assessment of the organophosphate pesticides.

The risk management decision documents for ethyl parathion, phorate, phosalone, and temephos were made through the organophosphate pesticide pilot public participation process, which increases transparency and maximizes stakeholder involvement in EPA's development of risk assessments and risk management decisions. The pilot public participation process was developed as part of the EPA-USDA Tolerance Reassessment Advisory

Committee (TRAC), which was established in April 1998, as a subcommittee under the auspices of EPA's National Advisory Council for Environmental Policy and Technology. A goal of the pilot public participation process is to find a more effective way for the public to participate at critical junctures in the Agency's development of organophosphate pesticide risk assessments and risk management decisions. EPA and USDA began implementing this pilot process in August 1998, to increase transparency and opportunities for stakeholder consultation.

EPA worked extensively with affected parties to reach the decisions presented in the risk management decision documents, which conclude the pilot public participation process for ethyl parathion, phorate, phosalone, and temephos. As part of the pilot public participation process, numerous opportunities for public comment were offered as these risk management decision documents were being developed. The ethyl parathion, phorate, phosalone, and temephos risk management decision documents therefore are issued in final, without a formal public comment period. The docket remains open, however, and any comments submitted in the future will be placed in the public docket.

The risk assessments for ethyl parathion, phorate, phosalone, and temephos were released to the public through the following notices published in the **Federal Register**:

1. Notices for ethyl parathion were published on January 15, 1999 (64 FR 2644) (FRL-6056-9) and March 1, 2000 (65 FR 11050) (FRL-6494-8).

2. Notices for phorate were published on August 12, 1998 (63 FR 43175) (FRL-6024-3) and September 1, 1999 (64 FR 47784) (FRL-6099-9).

3. Notices for phosalone were published on January 12, 2000 (65 FR 1867) (FRL-6486-9) and July 26, 2000 (65 FR 45982) (FRL-6737-3).

4. Notices for temephos were published on September 9, 1998 (63 FR 48213) (FRL-6030-2), December 18, 1998 (63 FR 70126) (FRL-6052-6), and October 6, 1999 (64 FR 54298) (FRL-6387-6).

EPA's next step under FQPA is to complete a cumulative risk assessment and risk management decision for the organophosphate pesticides, which share a common mechanism of toxicity. The interim risk management decision documents on phorate and phosalone cannot be considered final until this cumulative assessment is complete. The ethyl parathion and temephos REDs represent the Agency's final decisions

for these pesticides under the organophosphate pesticide review process.

When the cumulative risk assessment for the organophosphate pesticides has been completed, EPA will issue its final tolerance reassessment decision for phorate and phosalone, and further risk mitigation measures may be needed.
